 - [Content is always accurate and up-to-date.](#)
 - [Designed for adult learning.](#)
 - [Control of the trainer.](#)
 - [Great reference and refresher.](#)
 - [Consistent information delivered to entire staff.](#)
-
- Expert training**
 - Many years of healthcare informatics experience.
 - Certified trainers.
 - Certified IS professionals.
-
- Reduce training cost:**
 - After initial costs, you have a 24-hour per day trainer. Using eSmartCast® CBT, a trainer can teach any number of trainees at the same time. By customizing CBT programs to focus only on what trainees need to learn, training time and costs can be significantly reduced.
 - Because eSmartCast® CBT may enable you to reduce or eliminate travel for trainees, your total training costs can also be lessened.
 - No need to pay travel time and other fees of a contract trainer.

Designed for adult learners

- The trainee feels in control.
- The computer is non-judgmental and non-threatening. It provides a privacy factor that reduces learners' embarrassment about being in a "class" or making mistakes while answering questions in the training materials.
- The computer actively engages staff in the learning process, providing increased satisfaction.

Self-paced, flexible, and individualized:

- Staff members work at their own pace.
- *eSmartCast*[®] CBT can sequence training to match the trainee's needs. The computer can always match the trainee's schedule. CBT can reach trainees outside the traditional classroom, providing instruction on the job or at home.
- CBT provides immediate feedback to trainees on their progress. CBT does not have to be delivered to all staff at the same time, thus allowing the practice to maintain coverage of critical positions.
- Provides just-in-time training.

Tireless and available 24/7:

- It never needs a break.
- It is always there.
- It can train greater numbers of staff in a given time frame compared to other methods.
- It meets the need for round-the-clock (continuous) training.

Improve job performance:

- It trains people in specific skills for specific performance.
- It trains people in general skills that broadly affect general performance.
- It provides increased access to information tools for decision-making.

Content accurate and up-to-date:

- Courses will be kept up-to-date by our expert staff.
- When necessary, there will be different courses for different software versions.

Control of the trainer:

- Replay entire video until topic is mastered.
- Pause video to make notes, try-out new skill and handle interruptions.
- Rewind to gain clarity.
- Fast forward to area of interest.

Consistent Information:

- Eliminate confusion and contradictions
- Same information delivered to everyone.
- Makes possible the cross training of staff

Reference & Refresher:

- Conveniently available 24/7 for review.
- Quickly locate specific area of interest.
